EUGLOH
EUropean University alliance for GLObal Health
A balanced consortium
with complementary universities

5 universities representing:
- Geographic diversity
- Extensive expertise in topics related to Global Health
- Strong local ecosystems (bio-med-, health- and lots more; with national research organizations, companies, NGOs, ...)
- A unique set of large-scale infrastructures and platforms (SOLEIL Synchrotron, Neurospin, MAX IV, ESS, ELI, ...)
A cohesive topic embracing several fields and responding to crucial societal challenges: Global Health

Identify emerging challenges which require new forms of training and link pathways and disciplines

- The future of medicine (predictive, preventive, participative, personalised) and emerging diseases
- Digital health (health data, AI, robotics, ...) and technological changes
- Healthy life, well-being and healthy lifestyle practices
- Big instruments and large-scale facilities for Global Health
- Climate change and its consequences, environmental health and biodiversity
- “One health”
- Human and social sciences for health (health economics and management, health policy, law, ethics and responsible research, ...)

...
Joint values and overall objectives

Major values:
- Fundamental right to health
- Fundamental right to education
- Intercultural understanding
- Geographical and cultural diversity

Overall objectives:
- Joint training of the next generation of European citizens, future experts and leaders – ready to innovate in Global Health challenges
- Building the European University of the future – innovative, interdisciplinary, inclusive, integrated into the ecosystem
- Creating the European Health Area, comprising Higher Education, Research and Innovation for the benefit of the society
- Quality improvement in higher education towards higher-level EU standards
A common long-term vision

**Convey values**
- Train students and staff on European values
- Combine excellence and inclusiveness
- Reinforce mobility within the Alliance on all levels and within all categories

**Develop skills**
- Develop skills for the jobs of the future on professions and issues linked to Global Health challenges and the European Health Area
- Train students to make them open and adaptable to a globalised and changing environment
- Make students actors of their educational path and future career
- Develop new joint/dual multidisciplinary programmes in initial and life-long training
- Develop new joint innovative pedagogic resources and digital tools

**Reinforce integration**
- Provide joint access to infrastructures and platforms for education
- Develop a shared innovative governance structure and joint support services
- Foster quality improvement and mutual learning
- Integrate the Alliance within territories and ecosystems
A shared governance structure

Governing Board

Project Management Team
- WP1 Management of the project
  - Lead: UPSaclay
- WP2 Joint curricula design
  - Lead: LU

Executive Board
- WP3 Research & Innovation
  - Lead: USZ
- WP4 Professional and personal development & employability
  - Lead: UPorto

Student Board

Advisory Committee
- WP5 Alliance campus life
  - Lead: UPSaclay
- WP6 Sustainability and Dissemination
  - Lead: LMU
